How to write a problem statement. Published on April 15, 2019 by Shona McCombes. Revised on June 19, 2020. After you have identified a research problem for your project, the next step is to write a problem statement. An effective problem statement is concise and concrete.

There are generally three ways you are asked to write about a research problem: 1) your professor provides you with a general topic from which you study a particular aspect; 2) your professor provides you with a list of possible topics to study and you choose a topic from that list; or, 3) your professor leaves it up to you to choose a topic and you often have to obtain permission to write about it before beginning your investigation. Here are some strategies for getting started for each ...
