Aspire 4830T: Stereo Mix missing. — Acer Community

My 4830T seems to recognize and use 16GB (2 x 8GB) perfectly in BOTH windows 7 (SP1), AND Windows 10. So although the 4830T has an official max of 8GB, anecdotally, it can handle 16B. I have used these specific G.Skill and Kingston HyperX modules (to be clear, I did not mix the module brands).
