The Book of Jhereg and The Book of Taltos collected the first five novels of Steven Brust's highly imaginative fantasy series that Locus praised as "entertaining and worth reading." The Book of Athyra features books six and seven in the series—Athyra and Orca. Vlad Taltos is a sorcerer and assassin without peer—as deadly at spell casting as he is with sword wielding. Accompanying him on his journeys are two leathery-winged jhereg who share a telepathic link with Vlad—and triple his chances against even the most powerful of enemies... In Athyra, Vlad finds he's ready to retire himself and his jhereg companions, but the biggest hitters of the House of the Jhereg have something else in mind. In Orca, Vlad must repay a debt to a boy who saved his life—even if it means breaking a financial scandal big enough to bring down the House of the Orca, and possibly the entire Empire...

Suzanna Miller must give up her baby to give him the best life. Can she ever find the forgiveness that would heal her heart? Suzanna Miller made a silly mistake. When she leaves the baby at a couple's home, she wonders if she will ever see him again? Faith's

Creek is a wonderful Amish community. She knows her baby will be loved and given everything she cannot give him. Once she has seen him taken inside, she walks away. Davie Jones—an ugly duckling growing up in small-town Mississippi with a mother who couldn't get any meaner—is positive her life couldn't be any worse. Just when she's resigned herself to her fate, she sees a movie that will change her life—*Sixteen Candles*. But in her case, life doesn't imitate art. Tormented in school and hopelessly in unrequited love with a handsome football player, Davie finds it bittersweet to dream of Molly Ringwald endings. When a cruel school prank goes too far, Davie leaves the life she knows and reinvents herself in the glittery world of Hollywood—as a beautiful and successful lounge singer. Just as she's about to ride off into the L.A. sunset, the past comes back with a vengeance, threatening to crush Davie's dreams—and break her heart again. With wholly original characters and a cinematic storyline, *32 Candles* introduces Ernessa T. Carter, a new voice in fiction with smarts, attitude, and sassiness to spare.

Collects essays, poetry, drama, and fiction written by Hispanic American authors and arranged by theme, discusses literary movements

and trends, and includes a timeline of Latino historical and cultural events occurring from 1492 to 2005.

They may ride off into the sunset, but cowboys never go out of style.

These manly men embody the fiercely independent, earthy alpha male and hero who isn't afraid to show the gentle, nurturing side of his complex nature when faced with a woman in need. Even when he's coated with dust from riding behind a herd of cattle or up to his knees in mud freeing a calf from a wallow, this stud still generates a lot of Cowboy Heat. Delilah Devlin's Cowboy Lust was a sensation, hitting the top ten of romance books and generating a river of praise. Award-winning Devlin is back on the ranch with stories of rugged romantics, rough riders, and rope wranglers sure to satisfy any reader who craves the idea of that gruff, romantic hero, a man of few words but many moves. Cowboy Heat sits tall in the saddle, winning hearts and spurring readers to new heights of happiness.

This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because

software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.

A dark, engrossing, blood-drenched tale of the familiar threats to female power—and one girl's journey to regain it. Five starred reviews greeted this powerful story from Elana K. Arnold, author of the Printz Honor winner *Damsel*. You are alone in the woods, seen only by the unblinking yellow moon. Your hands are empty. You are nearly naked. And the wolf is angry. Since her grandmother became her caretaker when she was four years old, Bisou Martel has lived a quiet life in a little house in Seattle. She's kept mostly to herself. She's been good. But then comes the night of homecoming, when she finds herself running for her life over roots and between trees, a fury of claws and teeth behind her. A wolf attacks. Bisou fights back. A new moon rises. And with it, questions. About the blood in Bisou's past, and on her hands as she stumbles home. About broken boys and vicious wolves. About girls lost in the

woods—frightened, but not alone.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL"

of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.
