Relaxation techniques: Relaxation techniques are used to deal with the symptoms of distress. It helps in feeling relaxed and in a better state of mind [2]. Relaxation technique was used with the client in order to make the client relaxed and feel better and to deal with his stress symptoms.

Case Study of Drug Addict - MedCrave online

Rehab clinic case studies are a highly valuable tool to help understand the rehabilitation process and to understand the human angle of every addiction treatment that we offer. It's all too easy to look at rehab as a structured process, but at Serenity Addiction Centres we know that it is vital to view our patients as individuals and to offer a safe and kind environment that helps to support their healing journey.
