A complete one-stop review of the clinically important aspects of histology and cell

biology--user-friendly,
concise, and packed
with learning aids!
The ideal review for
course exams and the
USMLE! This popular
title in the LANGE
series is specifically
designed to help you
make the most of your
study time--whether
you're studying
histology and cell

Page 230/547

biology for the first time or reviewing for course exams or the USMLE. With this focused review you will be able to pinpoint your weak areas, and then improve your comprehension with learning aids especially designed to help you understand

Page 231/547

and retain even the most difficult material. You will find complete easy-to-follow coverage of all the need-to-know material: fundamental concepts, the four basic tissues types, and organs and organ systems--presented in a consistent, time-saving design. At the

Page 232/547

conclusion of the book, you will find a Diagnostic Final Exam that has been updated with longer, case-related stems that mimic the USMLE Step 1 examination. Each chapter is devoted to one specific topic and includes learning aids such as: Objectives
