Earth Changes Media – Your #1 Source for EARTH SCIENCE NEWS

Solar Minimum is Coming | Science Mission Directorate

Earth Changes and the Ascension of Planet Earth THE NEW EARTH Earth's Ascension and the coming Earth Changes: Planet Earth and Humanity are rapidly approaching a time of significant Earth Changes as part of an ending of a major Evolutionary Age for all inhabited worlds within our Universe.

Among the topics discussed are: the growing evidence that predicted Earth changes are beginning to occur; the probability that a pole shift may indeed be developing and will cause many other physical changes; evidence that the lost continent of Atlantis actually existed and that portions of it are rising now; the countries to be affected by coming Earth changes, including the "safety lands" in the United States and southern Canada; and how we can change the world's consciousness and thus ...

Solar Minimum is Coming. High up in the clear blue noontime sky, the sun appears to be much the same day-in, day-out, year after year. But astronomers have long known that this is not true. The sun does change. Properly-filtered telescopes reveal a fiery disk often speckled with dark sunspots.

Solar Minimum is Coming | Science Mission Directorate

Providing information and discussion about the Earth Changes, the pending Pole shift, and how to prepare for this event.

Earth Changes and the Pole Shift

Dear Members of EarthChangesMedia.com, I deeply regret to inform you that this website has come to its end. You likely remember when founder Mitch Battros made his plea for help last year, saying that he would be needing to close the site.

Earth Changes Media – Your #1 Source for EARTH SCIENCE NEWS

Major global Earth changes will begin in the United States as the North American Plate buckles, creating the Isles of California — 150 islands in all. Eventually, through tectonic plate buckling and fractures followed by inundations, the West Coast will recede eastward to Nebraska, Wyoming and Colorado.

SPIRIT MESSAGE ABOUT THE COMING EARTHCHANGES

Home > Earth Changes Map Earth Changes Map Based on his 25 years of visions, Gordon-Michael Scallion has created a map that depicts the earth changes he sees coming to North America during the years 1998 through 2012.

Earth Changes - YouTube

Big Dreams are those that seem to be messages for greater humanity, rather than for the individual dreamer. It branches out to other areas that are related, such as crop circle formations, UFOs/ETs, myths and religions. We feel that messages are coming

from many sources concerning a great world change or transformation.

DREAMS OF THE GREAT EARTH CHANGES

It's true that the EM field changes polarity every so often, but many are saying the Earth could flip on its axis. In order for the earth to reverse its direction of rotation or turn upside down, this would require a tremendous change in momentum, greater than anything since the Big Bang probably.

Earth Changes - Sal Rachele
