Math 310 - Final Exam Page 4 of 15 [10 marks] 2. (a) Find values of the constants a and b such that $x^{-1/2}$ is an integrating factor for the following ODE: $axy' + y = \cos x$ (b) For the values of a and b from part (a), find the solution y(x) of this equation as an

Math 310 - Simon Fraser University

Calculus Challenge Exam questions are based on topics covered in the Calculus 12 curriculum, but the exam is not intended to be a summative assessment for the course. Because the exam can be used to obtain credit for a first-semester calculus course, the level of difficulty is on par with a Calculus I final exam.

Calculus Challenge Exam - Simon Fraser University

How to use old exams or practice exams. It may be useful to use previous or practice exams in the following ways: Become familiar with the format of past exams, the type of questions asked, and the style in which they are phrased. Be aware of possible variation, as the format of an exam may change from year-to-year.
