Many businesses fail today, but not because of poor financing, outdated

Page 65/137

technology, or lack of qualified employees. They fail because they lack the very basic elements that are characteristic of all successful businesses. They have become reliant on high priced consultants, to

Page 66/137

advise them on a course of action, to make their companies profitable, without looking internally for the answers that are already there. Businesses look to technology as the answer for many of all of their

Page 67/137

financial shortcomings. Rather than increasing revenues through aggressive and creative sales programs, they opt for the short-sighted approach of cutting expenses and dispensing with valuable

Page 68/137

experienced employees. But, there is another option. As a struggling golfer must step back and reexamine his setup, approach, and follow through, so too, must company owners step back and reexamine the

Page 69/137

mechanics of their business.
They do not need to reinvent
the wheel, they need to use the
wheel. It is time for businesses
to concentrate on The Bottom
Line and get Back to Basics.

fundamentals of risk management and is relevant for all students of health and safety, while Part 1.2 covers the required basic human factors material required for health and safety qualifications. Part 2.1 deals with the more advanced aspects of

This concise and comprehensive Understanding treatise is designed to complement any products liability casebook. Part I consists of an overview of the

Page 108/137

complex body of products liability caselaw and statutes that has developed over the past century. The chapters follow a functional approach and begin with the four theories that are the foundation of all products liability cases:

Page 109/137

warranty, misrepresentation, negligence, and strict liability. Separate chapters in Part I then examine the principle types of product defects (design, manufacturing, and failure to warn) and some of the problems

Page 110/137

involved with proving that the product was defective and that the defect was the cause of the injury. Finally chapters focus on the various defenses available in a products liability action and the types of damages that a plaintiff

Page 111/137

may seek. An understanding of products liability law also requires an examination of the issues involved in the prosecution or defense of a products liability case. Part II addresses a range of those

Page 112/137

issues, including researching the case; drafting the complaint; interrogatories and requests to admit facts; requests for the production of documents; discovery and evidence depositions; protective orders;

Page 113/137
