A totalitarian regime has ordered all books to be destroyed, but one of the book burners suddenly realizes their merit.

The march to the Trump presidency began in 1988, when Rush Limbaugh went national. Brian Rosenwald charts the transformation of AM radio entertainers into political kingmakers. By giving voice to the conservative base, they reshaped the Republican Party and fostered demand for a president who sounded as combative and hyperbolic as a

talk show host.

The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we're never aware of it. The hidden brain decides whom we fall in love with and whom we

hate. It tells us to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and its decisive impact on the choices we make as individuals and as a

society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed. A journalist recounts the surprising history of accidents and reveals how they've come to define all that's wrong with America. We hear it all the time: "Sorry, it was just an accident." And we've been deeply conditioned to just accept that explanation and move on. But as Jessie Singer argues convincingly: There are no such things as accidents. The vast majority of mishaps are not random but predictable and preventable. Singer uncovers just

how the term “accident” itself protects those in power and leaves the most vulnerable in harm’s way, preventing investigations, pushing off debts, blaming the victims, diluting anger, and even sparking empathy for the perpetrators. As the rate of accidental death skyrockets in America, the poor and people of color end up bearing the brunt of the violence and blame, while the powerful use the excuse of the “accident” to avoid consequences for their actions. Born of the death of her best friend, and the killer who insisted it was an accident, this book is a moving investigation of the sort of tragedies that are all too common, and all too

commonly ignored. In this revelatory book, Singer tracks accidental death in America from turn of the century factories and coal mines to today's urban highways, rural hospitals, and Superfund sites. Drawing connections between traffic accidents, accidental opioid overdoses, and accidental oil spills, Singer proves that what we call accidents are hardly random. Rather, who lives and dies by an accident in America is defined by money and power. She also presents a variety of actions we can take as individuals and as a society to stem the tide of "accidents"—saving lives and holding the guilty to account.

In the summer of 1978, the B-52's conquered the New York underground. A year later, the band's self-titled debut album burst onto the Billboard charts, capturing the imagination of fans and music critics worldwide. The fact that the group had formed in the sleepy southern college town of Athens, Georgia, only increased the fascination. Soon, more Athens bands followed the B-52's into the vanguard of the new American music that would come to be known as "alternative," including R.E.M., who catapulted over the course of the 1980s to the top of the musical mainstream. As acts like the B-52's, R.E.M., and Pylon drew the eyes of New York

tastemakers southward, they discovered in Athens an unexpected mecca of music, experimental art, DIY spirit, and progressive politics--a creative underground as vibrant as any to be found in the country's major cities. In Athens in the eighties, if you were young and willing to live without much money, anything seemed possible. Cool Town reveals the passion, vitality, and enduring significance of a bohemian scene that became a model for others to follow. Grace Elizabeth Hale experienced the Athens scene as a student, small-business owner, and band member. Blending personal recollection with a historian's eye,

she reconstructs the networks of bands, artists, and friends that drew on the things at hand to make a new art of the possible, transforming American culture along the way. In a story full of music and brimming with hope, Hale shows how an unlikely cast of characters in an unlikely place made a surprising and beautiful new world.

our own tumultuous era. The great scholar, W. E. B. Du Bois, once wrote about the Problem of race in America, and what he called "Double Consciousness," a sensitivity that every African American possesses in order to survive. Since childhood, Ailey Pearl Garfield has understood Du Bois's words all too well. Bearing the names of two formidable Black Americans—the revered choreographer Alvin Ailey and her great grandmother Pearl, the descendant of enslaved Georgians and

tenant farmers—Ailey carries Du Bois's Problem on her shoulders. Ailey is reared in the north in the City but spends summers in the small Georgia town of Chicassetta, where her mother's family has lived since their ancestors arrived from Africa in bondage. From an early age, Ailey fights a battle for belonging that's made all the more difficult by a hovering trauma, as well as the whispers of women—her mother, Belle, her sister, Lydia, and a maternal line reaching back two centuries—that

urge Ailey to succeed in their stead. To come to terms with her own identity, Ailey embarks on a journey through her family's past, uncovering the shocking tales of generations of ancestors—Indigenous, Black, and white—in the deep South. In doing so Ailey must learn to embrace her full heritage, a legacy of oppression and resistance, bondage and independence, cruelty and resilience that is the story—and the song—of America itself.

Concentration of the media has reached new heights, making it harder for alternative and critical voices to gain a hearing. The recent \$86 billion merger of Time Warner and AOL is just one of many signs of the narrowing of information sources. Market pressures have also encroached on the original mission of public broadcasting, which was to "provide a voice for groups that may otherwise be unheard." Yet around the country,

creative journalists and activists are creating more democratic, informative, and engaging media. Whether they are working to defend and expand democratic access to existing media or building their own media alternatives through the radio, television, or the World Wide Web, they are pioneering new ways of sharing information. In the *Decline and Fall of Public Broadcasting*, David Barsamian gives an insider's account of these new media activists and the challenges they confront, drawing on his years of experience in public radio. Since 1986, Barsamian has been the producer of the highly acclaimed *Alternative Radio*, a weekly one-hour public affairs

program broadcast in North America, Europe, South Africa, and Australia, as well as short-wave radio and the Internet. David Barsamian is the producer of the award-winning syndicated radio program Alternative Radio. His interview books with luminaries such as Noam Chomsky, Howard Zinn, and Edward W. Said have sold in the hundreds of thousands. His most recent interview book is Propaganda and the Public Mind: Conversations with Noam Chomsky (South End Press, 2001). In keeping with the state's
major demographic
upheavals of recent decades,
Georgia politics is an
interesting--and sometimes

volatile--mix of tradition and change. In contrast to the state's rural past, most Georgians now live in cities or suburbs, and more than 40 percent of the population was born outside the state. However, religion and race remain issues that politicians ignore at great peril, and the state still fares poorly in measures of poverty, education, and voter turnout. Politics in Georgia uses a comparative framework to examine four major topics: the foundations of contemporary Georgia politics, political

participation, major political institutions, and selected public policies. Material new to this edition includes: analysis of 2006 state elections coverage of trends and events since the book first appeared in 1997 an examination of the Republican Party's rise in Georgia an entirely new chapter on public opinion significantly expanded treatment of public policy on such issues as the environment, social welfare, education, transportation, economic development, and public safety discussions of

major federal court cases that deal with Georgia-and that have set important precedents for the nation Throughout, Politics in Georgia compares the state with the federal government and the other forty-nine states, as well as with earlier periods of Georgia's political development. The result is a thorough, up-to-date resource on Georgia's dynamic political system. Engelman examines the origins, evolution and politics behind the development of the major noncommercial radio and television

institutions in the United States - National Public Radio, Radio Pacifica and the Public Broadcasting Service. Washington Post Notable Book | One of NPR's Best Books of 2021 The definitive behind-the-scenes story of Trump's final year in office, by Phil Rucker and Carol Leonnig, the Pulitzer-Prize winning reporters and authors of A Very Stable Genius. "Chilling." - Anderson Cooper "Jaw-dropping." - John Berman "Shocking." - John Heilemann "Explosive." - Hallie Jackson "Blockbuster new reporting." - Nicolle Wallace "Bracing new revelations." - Brian

*Williams "Bombshell reporting." - David Muir
The true story of what took place in Donald Trump's White House during a disastrous 2020 has never before been told in full. What was really going on around the president, as the government failed to contain the coronavirus and over half a million Americans perished? Who was influencing Trump after he refused to concede an election he had clearly lost and spread lies about election fraud? To answer these questions,*

Phil Rucker and Carol Leonnig reveal a dysfunctional and bumbling presidency's inner workings in unprecedented, stunning detail. Focused on Trump and the key players around him—the doctors, generals, senior advisers, and Trump family members—Rucker and Leonnig provide a forensic account of the most devastating year in a presidency like no other. Their sources were in the room as time and time again Trump put his personal gain ahead of the good of the country. These

witnesses to history tell the story of him longing to deploy the military to the streets of American cities to crush the protest movement in the wake of the killing of George Floyd, all to bolster his image of strength ahead of the election. These sources saw firsthand his refusal to take the threat of the coronavirus seriously—even to the point of allowing himself and those around him to be infected. This is a story of a nation sabotaged—economically, medically, and

politically—by its own leader, culminating with a groundbreaking, minute-by-minute account of exactly what went on in the Capitol building on January 6, as Trump's supporters so easily breached the most sacred halls of American democracy, and how the president reacted. With unparalleled access, Rucker and Leonnig explain and expose exactly who enabled—and who foiled—Trump as he sought desperately to cling to power. A classic and heart-racing work of

investigative reporting, this book is destined to be read and studied by citizens and historians alike for decades to come. Go behind the scenes of our most ambitious radio programs and witness an intensely creative moment in a medium that's changing the way we tell stories. Every week, millions of devoted fans download or tune in to *This American Life*, *The Moth*, *Radiolab*, *Planet Money*, *Snap Judgment*, *Radio Diaries*, *99%* *Invisible*, and other nonfiction narrative radio

shows. The compelling stories they produce are almost cinematic in scope and approach—intricately weaving sound into robust and engaging storytelling. A lot goes into making the shows we love. Anchored by surprising characters and big questions, their stories are tightly structured, edited, and soundtracked, and they introduce us to authentic voices from every walk of life. Radio and podcasts today are entrepreneurial and DIY; there's a can-do, collaborative spirit that characterizes people

working in this field, fearlessly breaking new artistic ground. And more than ever, given the excellence and explosive popularity of shows like *Serial*, it's clear that the creative producers working in this medium hold the key to storytelling secrets that the rest of us must learn. Out on the Wire, a documentary comic, literally illustrates those secrets, gleaned straight from those on the frontlines of radio's revolution. With the help of *This American Life*'s Ira

Glass, cartoonist Jessica Abel uncovers just how producers construct a story, spilling some juicy insider details along the way. Jad Abumrad of RadioLab talks about chasing moments of awe with scientists, while Planet Money's Robert Smith speaks candidly about his slightly embarrassing strategy for putting interviewees at ease. And Abel reveals how mad—really mad—Ira Glass becomes when he receives tough edits from his colleagues. Informative and inventive, Out on the

Wire shows us the magic that makes these shows great and why we can't stop listening to them.

white minority of Americans have used “the world’s greatest deliberative body” to hijack our democracy. Every major decision governing our diverse, majority-female, and increasingly liberal country bears the stamp of the United States Senate, an institution controlled by people who are almost exclusively white, overwhelmingly male, and disproportionately conservative. Although they do not represent a majority of Americans—and will not for the foreseeable future—today’s Republican senators possess the power to block most legislation. Once known as “the world’s greatest deliberative body,” the Senate has become one of the greatest threats to our democracy. How did this happen? In Kill Switch,

Page 47/67

Senate insider Adam Jentleson contends that far from reflecting the Framers' vision, the Senate has been transformed over the decades by a tenacious minority of white conservatives. From John Calhoun in the mid-1800s to Mitch McConnell in the 2010s, their primary weapon has been the filibuster, or the requirement that most legislation secure the support of a supermajority of senators. Yet, as Jentleson reveals, the filibuster was not a feature of the original Senate and, in allowing a determined minority to gridlock the federal government, runs utterly counter to the Framers' intent. For much of its history, the filibuster was used primarily to prevent civil rights legislation from becoming law. But more recently, Republicans

have refined it into a tool for imposing their will on all issues, wielding it to thwart an increasingly progressive American majority represented by Barack Obama's agenda and appointees. Under Donald Trump, McConnell merged the filibuster with rigid leadership structures initially forged by Lyndon Johnson, in the process surrendering the Senate's independence and centrality, as infamously shown by its acquiescence in Trump's impeachment trial. The result is a failed institution and a crippled democracy. Taking us into the Capitol Hill backrooms where the institution's decline is most evident, Jentleson shows that many of the greatest challenges of our era—partisan polarization, dark

money, a media culture built on manufactured outrage—converge within the Senate. Even as he charts the larger forces that have shaped the institution where he served, Jentleson offers incisive portraits of the powerful senators who laid the foundation for the modern Senate, from Calhoun to McConnell to LBJ’s mentor, Richard Russell, to the unapologetic racist Jesse Helms. An essential, revelatory investigation, Kill Switch ultimately makes clear that unless we immediately and drastically reform the Senate’s rules and practices—starting with reforming the filibuster—we face the prospect of permanent minority rule in America. A Pulitzer Prize-winning history of

the mistreatment of black Americans. In this 'precise and eloquent work' - as described in its Pulitzer Prize citation - Douglas A. Blackmon brings to light one of the most shameful chapters in American history - an 'Age of Neoslavery' that thrived in the aftermath of the Civil War through the dawn of World War II. Using a vast record of original documents and personal narratives, Blackmon unearths the lost stories of slaves and their descendants who journeyed into freedom after the Emancipation Proclamation and then back into the shadow of involuntary servitude thereafter. By turns moving, sobering and shocking, this unprecedented account reveals these stories, the companies that profited the most

from neoslavery, and the insidious legacy of racism that reverberates today.

Rationale and step-by-step instructions for creating classroom assessments that accurately measure what students know and are able to do. Interviews and essays describe the way of life and crafts of pioneer America still surviving in

the Appalachian region. In 2018 almost half of all vehicles made in North America were produced at foreign-owned plants, and the sector was on track to monopolize the market. Despite this, the industry has been overlooked compared with its domestic counterpart, both in scholarship and popular memory. Redressing this neglect, *America's Other Automakers* provides a new history of the foreignowned auto sector, the first to extensively draw on archival sources and to articulate the human agency of participants, including workers, managers, and industry recruiters. Timothy J. Minchin challenges the view that the industry's growth primarily

reflected incentives, stressing human agency and the complexity of individual stories instead. Deeply human in its approach, the book also explores the industry's impact on grassroots communities, showing that it had more costs than supporters acknowledged. Drawing on a wide range of primary and secondary sources, *America's Other Automakers* uncovers significant tensions over unionization, reports of discriminatory hiring, and unease about the industry's rapid growth, critically exploring seven large assembly facilities and their impact on the communities in which they were built.

provides an intellectual history,*

critiquing prevailing Western ideas on the subject and challenging assumptions. He analyses colonialist and gendered attitudes, materialist and romanticist perspectives, spiritualist approaches to color, color in the age of reproduction, and modernist and post-modernist color strategies. Highlighted throughout are examples of the ways in which attitudes towards color have been impacted by the legacy of colonialism and are tied up with race, gender, and class. Topics covered include color models, wheels and charts, color interaction and theories of perception, with over 150 images throughout. By placing under-examined tenets of color theory such as the color wheel and color primaries within the Western industrial context that generated them, Fine helps you to connect color

choices to color meanings and apply theory to practice.

A New York Times Notable Book! A New York Times Book Review Editors' Choice The story of how Newt Gingrich and his allies tainted American politics, launching an enduring era of brutal partisan warfare When Donald Trump was elected president in 2016, President Obama observed that Trump "is not an outlier; he is a culmination, a logical conclusion of the rhetoric and tactics of the Republican Party." In Burning Down the House, historian Julian Zelizer pinpoints the moment when our country was set on a path toward an era of bitterly partisan and ruthless politics, an era that was ignited by Newt Gingrich and his allies. In 1989, Gingrich brought down Democratic Speaker of the House

Jim Wright and catapulted himself into the national spotlight. Perhaps more than any other politician, Gingrich introduced the rhetoric and tactics that have shaped Congress and the Republican Party for the last three decades. Elected to Congress in 1978, Gingrich quickly became one of the most powerful figures in America not through innovative ideas or charisma, but through a calculated campaign of attacks against political opponents, casting himself as a savior in a fight of good versus evil. Taking office in the post-Watergate era, he weaponized the good government reforms newly introduced to fight corruption, wielding the rules in ways that shocked the legislators who had created them. His crusade against Democrats culminated in the plot to

destroy the political career of Speaker Wright. While some of Gingrich's fellow Republicans were disturbed by the viciousness of his attacks, party leaders enjoyed his successes so much that they did little collectively to stand in his way. Democrats, for their part, were alarmed, but did not want to sink to his level and took no effective actions to stop him. It didn't seem to matter that Gingrich's moral conservatism was hypocritical or that his methods were brazen, his accusations of corruption permanently tarnished his opponents. This brand of warfare worked, not as a strategy for governance but as a path to power, and what Gingrich planted, his fellow Republicans reaped. He led them to their first majority in Congress in decades, and his legacy extends far beyond his

tenure in office. From the Contract with America to the rise of the Tea Party and the Trump presidential campaign, his fingerprints can be seen throughout some of the most divisive episodes in contemporary American politics.

Burning Down the House presents the alarming narrative of how Gingrich and his allies created a new normal in Washington.

Making Standards Work

*Linking People, Resources and

The early twentieth century witnessed a profound transformation in the history of modern sound media, as professional radio workers developed production practices and performance styles for broadcasting during the 1920s, its initial decade of expansion in

the United States. Mapping the programming forms pursued by early writers and programmers, production techniques adopted by studio engineers, and performance styles cultivated by on-air talent, Making Radio shows how workers within this burgeoning industry negotiated pressures from regulators, station owners, sponsors, and critics to develop defining sets of craft practices for one of the century's most

Page 62/67

influential studio arts. Radio workers' struggles to institutionalize standards of professional practice and win broader cultural acceptance for their medium, the book argues, secured broadcasting's place in American culture and established key precedents for neighboring film and record industries that guided their own conversions to electric sound. Making Radio reveals radio as the missing link in the

Page 63/67

history of modern sound culture, showing how radio workers shaped listening sensibilities for a new era of electric sound entertainment.

city bus and thrown in jail all because she wouldn't let a white man take her seat. To protest, the radio urged everyone to stay off city buses for one day: December 5, 1955.

Throughout the boycott--at Holt Street Baptist Church meetings led by a young minister named Martin Luther King, Jr.--and throughout the struggle for justice, Georgia served up her mouth-watering fried chicken, her spicy collard

greens, and her sweet potato pie, eventually selling them to raise money to help the cause. Here is the vibrant true story of a hidden figure of the civil rights movement, told in flavorful language by a picture-book master, and stunningly illustrated by a Caldecott Honor recipient and seven-time Coretta Scott King award-winning artist.
