School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist

Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. *Overcoming School Refusal* helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include:

- types of school

refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

After her nightmarish recovery from a serious car accident, Faye gets horrible news from her doctor, and it hits her hard like a rock: she can't bear children. In extreme shock, she breaks off her engagement, leaves her job and confines

herself in her family home. One day, she meets her brother's best friend , and her soul makes a first step to healing.

All Things Fun & Fascinating is the perfect tool to help teachers and parents of 3rd-5th graders teach writing with a clear, simple, step-by-step method using subjects that will fascinate young students. The lessons are meant to be a resource for teachers already familiar with Teaching Writing: Structure and Style.

She's on the sheriff's most wanted list.

Waking up with a naked woman holding a knife at his throat is just about the last thing Sheriff Travis Flynn expected. And the brother she's looking for? A murderer. And dead. Probably. But the real shock comes when she insists she's not a Lycan. LeAnn Wilcox isn't looking for love...especially not from some wolf in sheriff's clothing. She operates on the other side of the law. Once she finds her brother-alive-she'll get out of the pack's territory and go back to her regular, normal, non-furry life of changing jobs

and her name whenever her past closes in. The cool, logical Sheriff has finally met his match, but LeAnn's life is at stake if she won't claim her place in the pack, especially once his control over the pack is challenged and her brother's fate is questioned.

Step by Step to Proficiency in Diagnostic Ultrasound The workbook is divided into lessons that guide you—like a instructor in an ultrasound course—systematically through the individual organ systems and body regions. Key features of the fourth edition: - Special multiple-exposure photos demonstrate the dynamics of handling the transducer - Triplet-image units vividly illustrate transducer positioning, the ultrasound image, and relevant anatomy - Reference numbers on the accompanying diagrams help you to both actively develop

your knowledge and to test it at any time. The legend located on the back cover flap is the key to the reference numbers that are used consistently in each diagram. - Quiz images at the end of each chapter are the perfect tool for rigorous self-evaluation - Physical fundamentals are presented in vibrant, illustrative diagrams - Numerous practical tips and tricks make it easy to familiarize yourself with ultrasound - A primer on ultrasound interpretation explains specialized terminology concisely and clearly - Precise descriptions of algorithms for transducer positioning facilitate real-time examinations Videos (online access) showing relevant ultrasound

anatomy, optimal transducer positioning, and the images you will see on the monitor during examination let you experience the content live—a perfect complement to a book that will greatly improve your retention of the material.

This work explores Somalia's state collapse and the security threats posed by Somalia's prolonged crisis. Communities are reduced to lawlessness, and the interests of commercial elites have shifted towards rule of law, not a revived central state. Terrorists have found Somalia inhospitable, using it mainly for short-term transshipment. From about 5500 cal BC to soon after 5000 cal BC, the

lifeways of the first farmers of central Europe, the LBK culture (Linearbandkeramik), are seen in distinctive practices of longhouse use, settlement forms, landscape choice, subsistence, material culture and mortuary rites. Within the five or more centuries of LBK existence a dynamic sequence of changes can be seen in, for instance, the expansion and increasing density of settlement, progressive regionalisation in pottery decoration, and at the end some signs of stress or even localised crisis. Although showing many features in common across its very broad distribution, however, the LBK phenomenon was not everywhere the same, and there is a complicated

mixture of uniformity and diversity. This major study takes a strikingly large regional sample, from northern Hungary westwards along the Danube to Alsace in the upper Rhine valley, and addresses the question of the extent of diversity in the lifeways of developed and late LBK communities, through a wide-ranging study of diet, lifetime mobility, health and physical condition, the presentation of the bodies of the deceased in mortuary ritual. It uses an innovative combination of isotopic (principally carbon, nitrogen and strontium, with some oxygen), osteological and archaeological analysis to address difference and change across the LBK, and to

reflect on cultural change in general.

"Every War Must End" analyzes the many critical obstacles to ending a war -- an aspect of military strategy that is frequently and tragically overlooked. Ikli considers a variety of examples from twentieth-century history and examines specific strategies that effectively "won the peace." In the new preface, Ikli explains how U.S. political decisions and military strategy and tactics in Iraq have delayed, and indeed jeopardized, a successful end to hostilities.

Speaking all over the United States about apologetics issues, Charlie Campbell has heard just about every question skeptics have to offer. In this concise, reader-friendly handbook, he provides brief responses to the top-40 questions that keep people from the faith, such as... What evidence do you have that God

Page 13/55

exists? How do you know the Bible is actually true? What about those who have never heard of Jesus? Will they be condemned to hell? If God is so loving, why does He allow evil and suffering? How can you say Jesus is the only way to heaven? Don't all religions basically teach the same thing? Aren't a lot of churchgoers hypocrites? With a gracious introductory note to skeptical readers and a generous sprinkling of inspiring quotes throughout, this handy resource

From the heart of The Velvet a writing community built around the fervent love of neo-noir fiction comes an original anthology. Stacked with brilliant emerging writers alongside some of the

strongest established voices in contemporary literature, WARMED AND BOUND crosses literary boundaries on all sides, to deliver an altogether unique reading experience. Through seemingly opposed conventions, beautiful prose makes a hard impression on the short story form. From a scary love story to a nostalgic thriller, a hardboiled pursuit of salvation to the black humor that is existentialism, WARMED AND BOUND is rogue humility and lovesick noir, where

Planning is an important management function and its effective execution is crucial to ensure the success of any project. This second edition of Thomas Uher's and Adam Zantis' textbook maintains its focus on operational rather than strategic aspects of programming and scheduling of projects, providing the reader with the practical planning skills needed to be successful. Unlike most other textbooks that largely focus on the critical path method, Programming and

Scheduling Techniques includes a comprehensive review of a range of practices used around the world. Topics covered in this thoroughly revised edition include: deterministic scheduling techniques including the bar chart, the critical path method, the critical chain method, the multiple activity chart and the line of balance a comparison of the critical path and critical chain scheduling techniques options for computer-based scheduling stochastic

scheduling techniques including the critical path method based on Monte Carlo simulation and the Program Evaluation and Review Technique (PERT) risk in scheduling work study. By covering a broad range of scheduling techniques this book is suitable for those planning projects in any industry, particularly in interdisciplinary or international contexts. While Universal's Dracula and Frankenstein (both 1931) have received the most coverage of any of the studio's genre releases, it is the lesser known films that have long fascinated fans and historians alike. Starting with The Last Warning, a 1929 movie released as both a silent and a talkie, Universal provided a decade of films that entertained audiences and sometimes frustrated critics. Each of Universal's horror, science fiction and "twisted mystery" films receives an in-depth essay for each film. The focus is first on the

background to the making of the movie and its place in the Universal catalog. A detailed plot synopsis with critical commentary follows. Filmographic data for the film conclude the entry. Universal's The Shadow short film series is covered in an appendix. Many rare illustrations and movie posters are also included. This is the first instructional book of its kind, taking a strikingly new and refreshing approach to learning guitar, carefully designed to guarantee efficient practice with rewarding results. Whether your playing falls under one of

the more traditional styles, or whether you're a composer and arranger or exploring new musical regions and establishing your own musical direction or personal fusion of musical ideas and influences, The Praxis System has what you need. The name of the system ("Praxis" comes from the Greek word meaning "practice" and "to do") accurately reflects its general orientation. Play it first, getting sound and satisfaction out of the guitar immediately, and musical understanding will naturally follow. Praxis lets you choose the precise subject you want and

immediately provides relevant musical examples. And these examples are presented in such a way that the principle behind the example is always clear, thus allowing you to apply it directly to your music. Traditional guitar books try to teach you to play someone else's music, while Praxis takes you directly to being able to play anything that you want---someone else's music, your own music, and everything in between. Guitar instruction books are traditionally written in a progressive fashion; Book 1 first, then Book 2, etc. However, the selection and sequencing of

material is usually determined by the book rather than the reader, and the familiar result is that---while the book progresses, the student doesn't. Again, Praxis reverses this. You don't have to start with Book 1, there is no Book 1! You go where your interests lie. Just begin work on any one subject in any volume that attracts you. Because Praxis is a modular system, it can be reassembled into many different combinations. These different combinations of units can answer both varying curricular needs as well as individual interests. Titles: Style &

The rewards of carefully chosen alternative investments can be great. But many investors don't know enough about unfamiliar investments to make wise choices. For that reason, financial advisers Larry Swedroe and Jared Kizer designed this book to bring investors up to speed on the twenty most popular alternative investments: Real estate, Inflation-protected securities, Commodities, International equities, Fixed annuities, Stable-value funds, High-yield (junk) bonds, Private equity (venture capital), Covered calls, Socially responsible mutual funds, Precious metals equities, Preferred stocks, Convertible bonds, Emerging market bonds, Hedge funds, Leveraged buyouts, Variable annuities, Equity-indexed annuities, Structured investment products, Leveraged funds

The authors describe how the investments work, the pros and cons of each, which to consider, which to avoid, and how to get started. Swedroe and Kizer evaluate each investment in terms of: Expected returns Volatility Distribution of returns Diversification potential Fees Trading and operating expenses Liquidity Tax efficiency Account location Role in an asset-allocation program Any investor who is considering or just curious about investment opportunities outside the traditional world of stocks, bonds, and bank certificates of deposit would be well-advised to read this book.

Kate Winter teaches dog owners how to train their canine companions. During her spare time, accompanied by her Lab, Dakota, she explores the woods and beaches on foot or horseback. She's worried that something's happening in her relationship, but she can't get her girlfriend Trish to talk to her about it. Faith Hutchins recently lost her sight after a terrible outdoor accident. She's dealt with her anger, depression, and

blindness primarily on her own. A seeing-eye dog would help alleviate her reliance on anyone else, but the guide dog school has been unsuccessful in providing her with one. On a mission to find someone who will train a dog specifically for her, she ultimately zeroes in on Kate. They say lightning never strikes the same place twice. But positive lightning is notoriously unpredictable and can ignite a fire when and where least expected . . . no matter who's in its path."

This book is a resource for using the internet as a tool in all aspects of nursing research--conducting it, teaching it, and using it. From searching online databases to creating surveys and recruiting research subjects online,

the internet opens new possibilities in the research process, as well as new problems. Experienced researchers describe internet-based research methods, information on online methods for teaching research, and accessing the research of others. The appendixes include samples of existing research projects that use internet-based methodologies, as well as a listing of online resources for researchers.

The title is an effective, manualized parent education programme' - Educational Book Review This groundbreaking training programme has been developed in response to a real need for evidence-based early interventions for very young autistic children.

Authoritative and extensively tried and tested, it will help both parents and carers to understand the disorder and how it affects child development. Ultimately, the programme is designed to reduce the severity of emotional/behavioural difficulties by managing a child's particular problems and encouraging effective collaboration between professionals and parents. The programme is delivered through two accessible manuals - one for parents and one for clinicians - which provide all the information and materials you need. The Manual for Clinicians explains the purpose and content of each session and includes notes for discussion and teaching, a checklist of 'things to do', and photocopiable task

sheets for distribution and discussion. The Manual for Parents features tasks, exercises and discussion points for group sessions, and complements these training materials with engaging personal accounts, an introduction to the history of autism, information about approaches to treatment, and a list of useful websites and further reading. Structured as a series of individual and small group sessions, the programme is designed to run for 20 weeks and covers key areas such as understanding and managing difficult behaviour; changing/encouraging new behaviours; communication problems in verbal and non-verbal children; social problems; and how to work and play together. Together,

these manuals will provide you with all the information, support and resources you need to run this programme successfully.

Also included is information on laboratory tests, procedures, fluids and electrolytes, blood component therapy, ventilator management and commonly used medications.

Planning tasks involving existing structures are currently

among the most common types of contract, and almost every structure makes different demands and raises individual problems. Reflecting this state of affairs, there are a dizzying number of publications on the market, most of which are quite specialized. The Refurbishment Manual cuts through this jungle of publications. It defines terms and concepts, combines the narrowly focused perspectives of the specialists and offers concrete approaches to this wide-ranging topic. The Refurbishment Manual closes the gap between basic constructional literature and one-sided, highly specialized technical literature. It constitutes a practical planning aid on the subject of refurbishment, providing a basic introduction to the relevant aspects of building physics, fire protection,

sustainability and energy, hazardous materials, construction materials for interior and façade, historic preservation, and technical building equipment. It offers concrete tips on planning steps, methods of building analysis, and cost benchmarks, as well as clear constructional solutions with built projects as examples. A unique feature of the volume is the specially developed timeline, which allows the planner to quickly grasp, categorize, and evaluate a concrete building task and thus obtain an efficient planning overview.

Planungsaufgaben im Bestand gehören derzeit zu den häufigsten Auftragsarten und nahezu jedes Bauwerk stellt andere Anforderungen und weist individuelle Probleme auf. Analog dazu gibt es auf dem Markt eine fast

unüberschaubare Anzahl Publikationen in meist sehr spezialisierter Form. Der Sanierungsatlas möchte Licht in diesen Publikationsdschungel bringen: Er definiert Begrifflichkeiten, vereint die fokussierenden Betrachtungsweisen der Fachleute und vermittelt konkrete Herangehensweisen an diese weit gefächerte Thematik. Der Sanierungsatlas schließt die Lücke zwischen grundlegender Baukonstruktions- und sehr einseitig spezialisierter Fachliteratur. Das Buch stellt eine praktische Planungshilfe zum Thema Sanierung dar – und zwar in Form von relevanter Grundlagenvermittlung zu Bauphysik, Brandschutz, Nachhaltigkeits- und energetischen Aspekten, Schadstoffen, Baustoffen im Innenraum und an der

Fassade, zu Aspekten der Denkmalpflege ebenso wie zur technischen Gebäudeausstattung. Er liefert konkrete Hinweise zu Planungsschritten, Methoden der Bauanalyse und Kostenkennwerten sowie anschauliche Konstruktionslösungen am Beispiel gebauter Projekte. Einzigartig ist die speziell entwickelte Zeitschiene, mit deren Hilfe eine konkrete Bauaufgabe schnell erfasst, kategorisiert und bewertet werden kann – und die dem Planer somit einen effizienten Planungsüberblick verschafft.

This Proceedings Volume contains 32 articles on various interesting areas of present-day functional analysis and its applications:

Banach spaces and their geometry, operator ideals, Banach and operator algebras, operator and spectral theory, Frechet spaces and algebras, function and sequence spaces. The authors have taken much care with their articles and many papers present important

results and methods in active fields of research. Several survey type articles (at the beginning and the end of the book) will be very useful for mathematicians who want to learn "what is going on" in some particular field of research.

In *Reconstructing the Native South*, Melanie Benson Taylor examines the diverse body of

Native American literature in the contemporary U.S. South--literature written by the descendants of tribes who evaded Removal and have maintained ties with their southeastern homelands. In so doing Taylor advances a provocative, even counterintuitive claim: that the U.S. South and its Native American survivors have far more in common than mere geographical proximity. Both cultures have long been haunted by separate histories of loss and nostalgia, Taylor contends, and the moments when those experiences converge in explicit and startling ways have yet to be investigated by

Page 49/55

scholars. These convergences often bear the scars of protracted colonial antagonism, appropriation, and segregation, and they share preoccupations with land, sovereignty, tradition, dispossession, subjugation, purity, and violence. Taylor poses difficult questions in this work. In the aftermath of Removal and colonial devastation, what remains--for Native and non-Native southerners--to be recovered? Is it acceptable to identify an Indian "lost cause"? Is a deep sense of hybridity and intercultural affiliation the only coherent way forward, both for the New South and for

its oldest inhabitants? And in these newly entangled, postcolonial environments, has global capitalism emerged as the new enemy for the twenty-first century? *Reconstructing the Native South* is a compellingly original work that contributes to conversations in Native American, southern, and transnational American studies.
