Solutions for Multiple
System Operators (MSO's)

Mpls Tp Eci Telecom

Based on cooperation
between the ITU-T and the
IETF, MPLS-TP is emerging
as a reliable transport

infrastructure. MPLS-TP aims to provide telecoms operators with a reliable packet-based technology that's based on circuit-based transport networking. Large scale

deployments have four main objectives, all of which are met by MPLS-TP:

MPLS-TP: Packet Transport
Network Enabling
Technology

Mpls Tp Eci Telecom The
aim of MPLS-TP is to
support the transport of
packet-based services with
a degree of
predictability, which is
similar to that of

existing deterministic transport networks. To meet these objectives, MPLS-TP is strictly connection oriented and does not rely on IP forwarding or routing.

Based on cooperation between the ITU-T and the IETF, MPLS-TP is emerging as a reliable transport infrastructure. MPLS-TP aims to provide telecoms operators with a reliable packet-

based technology that's based on circuit-based transport networking. Large scale deployments have four main objectives, all of which are met by MPLS-TP:
