where it is
widely used. »
Dry onions are a
crop that lends
itself well to
small scale and
part-time
farming
operations. »
The term "dry
onion" is used

Page 27/128

to distinguish
them from green
onions

FARMERS HANDBOOK

Farming onion
plants requires
lot of water as
they initially
grow. However,
as the plants
mature, they do
not need much of
water. Sometimes

Page 28/128

you can just depend on rainwater but make sure that the plants absorb the right amount every 5-7 days. Mulching can help reduce the weeds and at the same time maintain the soil moisture level.

Page 29/128

How to Farm Onions - Startup Biz Hub

Onions generally require 30% of irrigation during a growing season and the closer to harvest, the greater the need for water. If the onion does

Page 30/128

not get enough water it will not make a large bulb. When the necks start falling over and the onions mature, watering should be discontinued and the soil allowed to dry.

Onion Farming,
Page 31/128

Overhead
irrigation is a
big no-no in
onion farming in
Kenya. That's
because this
makes your
onions prone to
bacterial and
fungal diseases.
In fact, you

Page 32/128

should apply
antifungal and
anti-bacterial
herbicides on a
biweekly basis.
Do weeding and
apply mulching
regularly

How to Grow
Onions on a
Small Farm -
Treehugger
Major types of
onions farmed in
Kenya are bulb
onions and
spring onions.
The best areas
suited for

Page 39/128

farming being
Karatina,
Oloitoktok,
Naivasha, Kieni,
Emali and Mai
Mahiu. Bulb
onions take 3 to
4 months to
reach maturity.
Short rains are
great for bulb
onions since
they can be
harvested

Page 40/128

between January
and February.

FARMERS

Page 123/128

HANDBOOK

Major types of onions farmed in Kenya are bulb onions and spring onions. The best areas suited for farming being Karatina, Oloitokitok, Naivasha, Kieni, Emali and Mai

Page 124/128

Mahiu. Bulb onions take 3 to 4 months to reach maturity. Short rains are great for bulb onions since they can be harvested between January and February.

How to Grow

Page 125/128

*Onions on a

growing season
and the closer
to harvest,
the greater*

Page 126/128

the need for water. If the onion does not get enough water it will not make a large bulb. When the necks start falling over and the onions mature, watering

Page 127/128

should be
discontinued
and the soil
allowed to
dry.
