from people with MS from around the world. They are delicious wholefood meat-free and dairy-free recipes for home cooks. There are recipes for all occasions, from quick and easy lunches and dinners, a variety of seafood dishes, to luxurious weekend breakfasts, special occasion cakes, and holiday baking. It includes vegan and gluten-free recipes, tips and a menu plan created by a qualified nutritionist. The recipes in this book are healthy for the whole family. They can be beneficial for anyone with heart disease, type 2 diabetes, lupus, rheumatoid arthritis and other

*inflammatory and auto-immune diseases. 'Mouth-watering and wholesome recipes' - Professor George Jelinek Montana has been the "last best place" for so many people. A century ago, Native Americans gathered here to perform the Ghost Dance—a last, doomed attempt to make white settlers vanish and bring back the old ways of life. Today, people are still pouring into Montana, looking for the pristine wilderness they saw in A River Runs through It. The reality of Montana—indeed, of all the West—has never matched the myths, but this book eloquently explores how the*

search for a perfect place is driving growth, development, and resource exploitation in Big Sky country. In ten personal essays, John Wright looks at such things as Montana myths; old-timers; immigrants; elk; ways of seeing the landscape; land conservation and land trusts; the fate of the Blackfoot, Bitterroot, and Paradise valleys; and some means of preserving the last, best places. These reflections offer a way of understanding Montana that goes far beyond the headlines about militia groups and celebrities' ranches. Montana never was

*or will be a pristine wilderness, but Wright believes that much can be saved if natives and newcomers alike see what stands to be lost. His book is a wake-up call, not a ghost dance.*

**This book is divided into  
four sections: invited  
papers, principles,  
systems and techniques.**

**The invited papers form an**

extensive overview of the state-of-the-art of production management. The themes range from the everlasting hunt for better productivity to the implications of CIM architectures (particularly CIM-OSA) for production management. The other three sections of the book look at the various problems affecting production management. One of the characteristics of modern production management is the need for better principles, systems and techniques for interorganizational

production management. Another topic of crucial relevance is the necessity to master not only repetitive manufacturing but also one-of-a-kind product manufacturing. From the managerial point of view, the forecast-based make-to-stock principles have proven insufficient, with market forces demanding fast and reliable deliveries of customer-oriented products. The goals of production management have been re-evaluated as a result.

BY THE ECONOMIST AND ONE  
OF THE BEST BOOKS OF 2021  
BY THE TIMES AND THE  
SUNDAY TIMES "Irreversible  
Damage . . . has caused a  
storm. Abigail Shrier, a  
Wall Street Journal  
writer, does something  
simple yet devastating:  
she rigorously lays out  
the facts." –Janice  
Turner, The Times of  
London Until just a few  
years ago, gender  
dysphoria—severe  
discomfort in one's  
biological sex—was  
vanishingly rare. It was  
typically found in less  
than .01 percent of the

population, emerged in early childhood, and afflicted males almost exclusively. But today whole groups of female friends in colleges, high schools, and even middle schools across the country are coming out as “transgender.” These are girls who had never experienced any discomfort in their biological sex until they heard a coming-out story from a speaker at a school assembly or discovered the internet community of trans “influencers.”

Unsuspecting parents are

awakening to find their daughters in thrall to hip trans YouTube stars and “gender-affirming” educators and therapists who push life-changing interventions on young girls—including medically unnecessary double mastectomies and puberty blockers that can cause permanent infertility. Abigail Shrier, a writer for the Wall Street Journal, has dug deep into the trans epidemic, talking to the girls, their agonized parents, and the counselors and doctors who enable gender

transitions, as well as to “detransitioners”—young women who bitterly regret what they have done to themselves. Coming out as transgender immediately boosts these girls’ social status, Shrier finds, but once they take the first steps of transition, it is not easy to walk back. She offers urgently needed advice about how parents can protect their daughters. A generation of girls is at risk. Abigail Shrier’s essential book will help you understand what the trans craze is and how you can inoculate

your child against it-or  
how to retrieve her from  
this dangerous path.
