

Sweet And Maxwell International Sports Law Review 2007

Sports marketing has become a cornerstone of successful sports management and business, driving growth in sport organisations and widening fan-bases. Showcasing the latest thinking and research in sports marketing from around the world, the Routledge Handbook of Sports Marketing goes further than any other book in exploring the full range of this exciting discipline. Featuring contributions from world-leading scholars and

practitioners from across the globe, the book examines theories, concepts, issues and best practice across six thematic sections—brands, sponsorship, ambush marketing, fans and spectators, media, and ethics and development—and examines key topics such as: consumer behaviour marketing communications strategic marketing international marketing experiential marketing and marketing and digital media Comprehensive and authoritative, the Routledge Handbook of Sports Marketing is an essential reference for any student or researcher working in sport marketing, sport management, sport

business, sports administration or sport development, and for all practitioners looking to develop their professional knowledge.

The interdependent coach-athlete relationship represents the most fundamental instance of a duty of care in sport. This book defines, analyses and clarifies the duty of care incumbent upon sports coaches and identifies important recommendations of real-world significance for coaching practice. Given the dynamic relationship between coaching, sport and the law, it is imperative that coaches have an informed awareness of the evolving

legal context in which they discharge their duty of care. Detailed analysis of a coach's duty of care has so far been lacking. The book addresses this gap by being the first to critically scrutinise the concept of duty of care in the specific context of sports coaching. Sustained analysis of the developing case law allows the scope and boundaries of the particular duties demanded of coaches to be rigorously examined. The legal principles and court decisions discussed relate to coaching delivered in a wide range of individual and team sports, at both amateur and professional levels of

performance, and include common scenarios and challenges frequently encountered by sports coaches globally. By adopting an interdisciplinary approach within a broader sociolegal methodological framework, this book's detailed analysis and original insights will prove highly instructive for practising coaches, coach educators, and national governing bodies of sport. It also offers extremely valuable insights for students, teachers and practitioners involved in sports law, sports coaching, sports ethics, tort law, sports policy and development, sports studies and physical

education.

Sports Law has quickly developed into an accepted area of academic study and practice in the legal profession globally. In Europe and North America, Sports Law has been very much a part of the legal landscape for about four decades, while in more recent times, it has blossomed in other geographic regions, including the Commonwealth Caribbean. This book recognizes the rapid evolution of Sports Law and seeks to embrace its relevance to the region. This book offers guidance, instruction and legal perspectives to students, athletes, those responsible for the

administration of sport, the adjudication of sports-related disputes and the representation of athletes in the Caribbean. It addresses numerous important themes from a doctrinal, socio-legal and comparative perspective, including sports governance, sports contracts, intellectual property rights and doping in sport, among other thought-provoking issues which touch and concern sport in the Commonwealth Caribbean. As part of the well-established Routledge Commonwealth Caribbean Law Series, this book adds to the Caribbean-centric jurisprudence that has been a welcome development across

the region. With this new book, the authors assimilate the applicable case law and legislation into one location in order to facilitate an easier consumption of the legal scholarship in this increasingly important area of law.

Long established as the market leading textbook on sports law, this much-anticipated new edition offers a comprehensive and authoritative examination of the legal issues surrounding and governing sport internationally. Locating the legal regulation of sport within an explicit socio-economic context, this refocused edition is

Page 8/72

divided into four core parts: Governance & Sport; Commercial Regulation; Sports Workplace; and Safety in Sport. Recent developments covered in this edition include: EU competition law interaction with sport under arts. 101 and 102 of the Treaty on the Functioning of the European Union; the current World Anti-Doping Agency code; analysis of the recent Court of Arbitration for Sport Jurisprudence; reforms of the transfer system in team sports; anti-discrimination provisions in sport; engagement with match fixing; a focus on the legal context of 2012 London Olympics.

Essential reading for students studying sports law or sports-related courses, this textbook will also prove useful to sports law practitioners and sports administrators in need of a clear companion to the field.

Historical Perspectives

Page 10/72

Arbitration is the normal and preferred mode for resolving international commercial disputes. It presents an essential advantage over national courts by offering neutrality of adjudication, but is currently only available where both parties have consented to it. This innovative book proposes a fundamental rethink of this assumption and argues that arbitration should become the default mode of resolution in international commercial disputes.

Match-Fixing and Sport studies match-fixing in historical perspective, revealing how match-fixing has always been a major sporting continuity, alongside another longstanding continuity, a widely-held belief in a mythical recent past of pristine purity. The volume begins with a brief overview of match-fixing's global contemporary contexts, the broad

range of sports where it now surfaces, increased recognition of its moral, social, and economic threat, and the varied responses of leading sports organizations, legal gambling operators, police forces, governmental departments, and regulators. The following chapters explore the challenges of finding any reliable evidence of match-fixing in the past. An overview shows that match-fixing has been a major and substantial longstanding historical continuity in sport, usually but not always is linked to gambling and sporting materialism. Examples are brought forward to show that it could be found in Ancient Greece and Egypt and was widespread across the early modern and modern periods around the globe. Overall, the volume assists scholars by suggesting some key questions which a future agenda for

the historical study of match-fixing might address. Revealing how high-stakes betting, dishonest dealings and suspicious performances can be found throughout history, Match-Fixing and Sport will be of great interest to scholars of Sport History and Sport Ethics. This book was originally published as a special issue of The International Journal of the History of Sport.

The important theme “What is Sports Law?” was the topic of the international Conference on “The Concept of Lex Sportiva Revisited”, which took place in Jakarta in late 2010. Academics and practitioners are still in debate to agree on this concept as is evident in this book. This book not only contains the worked out contributions of this Conference, but also other related chapters on the subject. It produces a

reassessment of the content of Sports Law and its terminology keeping a close eye on the current literature. The book appears in the ASSER International Sports Law Series, under the editorship of Prof. Dr. Robert Siekmann, Dr. Janwillem Soek and Marco van der Harst LL.M. The risk of athletes sustaining concussion while participating in professional team sports raises two serious concerns both nationally and internationally. First, concussion in sport carries a public health risk, given that injured athletes may have to deal with significant long-term medical complications, with some of the worst cases resulting in Chronic Traumatic Encephalopathy (CTE). Secondly, sports governing bodies are now exposed to the risk of financial and reputational damage as a consequence

of legal proceedings being filed against them. A good example of this, among many other recent examples, is the case of the United States of America's National Football League (NFL), the governing body for American football, which, in 2015, committed to pay US\$ 1 billion to settle the class action filed by its former professional players. This book examines how to most efficiently reduce these public health and legal risks, and proposes a harmonised solution across sports and legal systems.

Collected Papers

In *Regulating International Sport: Power, Authority and Legitimacy* Lloyd Freeburn provides a ground-breaking account of the legal basis of regulatory power in international sport and outlines the reforms necessary to give the regime legality and legitimacy.

International Sports Law Review

This book demonstrates that the European Union (EU) can curtail the autonomy of FIFA and UEFA by building upon insights from the principal-agent model. The author argues that EU institutional features complicate control, but do not render the EU powerless.

and that FIFA and UEFA can deploy a variety of strategies to mitigate control.

The book is an introduction to sports law, in particular International (worldwide) and European (EU) sports law. The chapters are all put in the perspective of the innovative sports law doctrine that is developed and presented in the opening chapter on what sports law is. After a general coverage of the core concept of “sport specificity” (that is whether private sporting rules and regulations can be justified notwithstanding they are not in conformity with public law), the book covers the following specific main themes of International and

European Sports Law (*capita selecta*): comparative sports law; competition law and sport; the collective selling of TV rights; sports betting; Social Dialogue in sport; sport and nationality; professional football transfer rules; anti-doping law in sport; transnational football hooliganism in Europe; international sports boycotts. In this book association football ("soccer") is the sport that is by far most on the agenda. It is the largest sport in the world and most popular all over the globe. The elite football in Europe is a day-to-day commercialized and professionalized industry, which makes it a perfect subject of study from an EU Law

perspective.

Routledge Handbook of Sports Marketing

Lex Sportiva: What is Sports Law?

Contracts, Legal Authority and Application

Understanding Sport Organizations

Research Handbook of Employment Relations in Sport

Sport, Physical Recreation and the Law

Employment relations, much discussed in other industries, has often been neglected in professional sports despite its unique characteristics. The book aims to explore in detail the unique nature of the employment relationship in professional sports and the

sport industry.

The book explores the definition and nature of guerrilla tactics in international commercial arbitration. It analyses various such tactics deployed (pre-Covid and during Covid times) and portrays them in a way that enables one to visualise how, and possibly why, they might be deployed. Attempts to codify ethical standards and rules regulating the behaviour of legal representatives in international arbitration are examined. The book covers a range of culture clashes, addresses several elephants in the room, and looks at factors inherent in the arbitral

process that create opportunities and increase temptations to misbehave. It considers the remedies and sanctions available in international arbitration and compares them to those available to the courts in civil litigation. In addition to recommendations for future research, the book offers solutions to curb the problem in line with party autonomy and with a critical analysis. “This manuscript is an essential solutions-based text that not only addresses a comprehensive range of modern-day guerrilla tactics in international commercial arbitration but also offers thoughtful

methods to deal with the shenanigans that parties may bring to the arbitral process.” - Chiann Bao, Independent Arbitrator, Arbitration Chambers and Vice President of the International Chamber of Commerce, Court of Arbitration “Dr. Ahuja’s book is a thoughtful and highly practical contribution to the study of procedures in international commercial arbitration. It is replete with scholarly analysis, careful treatment of authority, pragmatic insights and policy discussions. Any practitioner or student of international arbitration would benefit from this volume.” - Gary Born, Author,

Page 22/72

International Commercial Arbitration (3d ed. 2021) “A highly readable and informative book which identifies and analyses the numerous guerrilla tactics parties may attempt to deploy in international commercial arbitration, the factors which may encourage such behaviour, and practical mechanisms to keep the proceedings on track. Both erudite and practical, this book is a must-read for parties, counsel and arbitrators alike.” – Prof. Benjamin Hughes, Independent Arbitrator, The Arbitration Chambers

“Guerrilla tactics are a pertinent problem in arbitration. Dr. Ahuja’s well written book

not only describes the various tactics in a succinct way but provides extremely useful guidance on how to tackle them. It will be a primary source of reference for every practitioner faced with such tactics.” - Prof. Dr. Stefan Kröll, Chairman of the Board of Directors of the German Arbitration Institute (DIS) “Taming the Guerrilla in International Commercial Arbitration offers a refreshingly candid and balanced discussion of ‘sharp practices’ in international arbitration. The book collects a wealth of information on guerrilla tactics previously only available in separate survey reports,

Page 24/72

articles, and guidelines on the topic. It additionally includes a chapter addressing tactics deployed in virtual or remote arbitrations due to the Covid-19 pandemic. The comprehensive research and analysis presented in this book make it a valuable resource to counsel, parties, arbitrators, academics, and those who deliver practical arbitration training. A must-read for those who want to better understand the practices that may lead some to disfavor arbitration and ways the arbitration community can respond to guerrilla tactics to improve the arbitration process for all participants.” –

Page 25/72

Dana MacGrath, Independent Arbitrator,
MacGrath Arbitration “From an unreasoned fiat
of a wise man who left both sides equally
unhappy but resolved the disputes
effectively, arbitration has evolved into a
full-scale trial before a party chosen
tribunal. Its informality and expedition puts
in peril the fundamental right of the
recalcitrant to delay proceedings. Dr. Ahuja
has assiduously articulated the measures,
aptly christened Guerrilla Tactics, used to
disrupt and derail arbitrations. An
indispensable read for the practitioner and
an insightful treatise for the policy maker.”

Page 26/72

- Harish Salve SA QC, Blackstone Chambers
“This book shines a spotlight on arbitration’s dark arts - guerrilla tactics. Dr Ahuja illuminates this shadowy world with excellent (and much needed) scholarship that is practice-based and useful for all stakeholders in arbitration. His examination of the root causes of this problem, recommendations on how to control it, comparisons with litigation practice and suggestions for future research marvellously combine to make this a work that is required to be consulted by all serious counsel, arbitrators, institutions and academics in

Page 27/72

the field of arbitration.” – Romesh Weeramantry, Head, International Dispute Resolution, Centre for International Law, National University of Singapore

Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of sports law in Trinidad and Tobago deals with the regulation of sports activity by both public authorities and private sports organizations. The growing internationalization of sports inevitably increases the weight of global regulation, yet each country maintains its own distinct regime of sports law and its own national and

local sports organizations. Sports law at a national or organizational level thus gains a growing relevance in comparative law. The book describes and discusses both state-created rules and autonomous self-regulation regarding the variety of economic, social, commercial, cultural, and political aspects of sports activities. Self-regulation manifests itself in the form of by-laws, and encompasses organizational provisions, disciplinary rules, and rules of play. However, the trend towards more professionalism in sports and the growing economic, social and cultural relevance of

sports have prompted an increasing reliance on legal rules adopted by public authorities. This form of regulation appears in a variety of legal areas, including criminal law, labour law, commercial law, tax law, competition law, and tort law, and may vary following a particular type or sector of sport. It is in this dual and overlapping context that such much-publicized aspects as doping, sponsoring and media, and responsibility for injuries are legally measured. This monograph fills a gap in the legal literature by giving academics, practitioners, sports organizations, and

policy makers access to sports law at this specific level. Lawyers representing parties with interests in Trinidad and Tobago will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative sports law.

Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of sports law in Ireland deals with the regulation of sports activity by both public authorities and private sports organizations. The growing internationalization of sports inevitably increases the weight of global regulation,

Taming the Guerrilla in International Commercial Arbitration

Towards Default Arbitration

Over the past two decades new international courts have entered the scene of international law and existing institutions have started to play more significant roles. The present volume studies one particular dimension of their increasing practice: international judicial lawmaking. It observes that in a number of fields of international law, judicial institutions have become significant actors and shape the law through adjudication. The contributions in this volume set out to capture this phenomenon in principle, in particular detail, and with regard to a number of individual institutions. Specifically, the volume asks how international judicial lawmaking scores

when it comes to democratic legitimation. It formulates this question as part of the broader quest for legitimate global governance and places it within the context of the research project on the exercise of international public authority at the Max Planck Institute for Comparative Public Law and International Law.

Michael Beloff QC is one of the outstanding lawyers of his generation. In this insightful and intimate book, he brings the reader on a journey through a career of highlights. These include his election as head of the Bar Associations (administrative law and sports law) and his presidency of Trinity College, Oxford. His judicial roles included appointments at the Courts of Appeal of Jersey and Guernsey. He arbitrated at five summer Olympics and chaired

the ethics and disciplinary bodies in two major international sports, cricket and athletics. Such a stellar career can't help but result in a fascinating memoir.

Sports law has been growing with increasing rapidity over the years since the first edition of this book was published in 1999, regularly making headlines as well as leading to a developing body of law practised by specialist lawyers. This revised work, by leading practitioners in the field, with a foreword by Lord Coe, provides a coherent framework for understanding the principles of sports law in this area, as well as a deep analysis of its key features. The subject is split into various areas of practice: first, regulatory rules, which embrace the constitutional aspect of organised sport, including the disciplinary procedures of the various governing

organisations; second, broadcasting and marketing resulting from the commercial exploitation, including sponsorship, of sports clubs, sporting events and players; and third, player's rights and obligations, which embraces a wide range of legal issues including club transfers and player contracts, and issues arising from employment (including discrimination law), personal injury and criminal law. Special attention is paid to the impact of EU and Human Rights law as well as to the influential jurisprudence of the Court of Arbitration for Sport. London 2012 provides an appropriate point at which to assess the current state of the law, as well as a look to the future. The target readership extends from solicitors, barristers and legal advisers, to sports organisations and clubs, corporations involved in marketing and sponsorship,

media companies, academics teaching sports law, and sports administrators. “I commend it to everyone who has to administer sport as well as to those who have to advise the administrators or argue cases in the field on whatever side. It is a gold medal book.” From the Foreword by Lord Coe KBE

This quarterly journal analyses current issues and developments in the practice of law as it affects sports business and sports-related litigation, and is the only source of full sports law reports. Edited by a team of well-known experts, it covers domestic and international developments in this fast-growing area. * The only journal to regularly publish full sports law reports * Also covers peripheral areas of law which impact on sports: personal injury, negligence, criminal law * Edited by a team of well-known experts * International

contributors advise on developments in their own countries as well as providing in-depth articles

Power, Legal Authority and Legitimacy in the Regulation of International Sport

Match-fixing represents a greater potential threat to the integrity of sport than doping. It has been linked to organised crime, illegal drugs and money-

laundering. Law enforcement and sporting authorities are struggling to establish legal and regulatory responses to this emerging threat, particularly in light of cross-border internet gambling. This book examines match-fixing and the legal responses to it in three key Asian sporting nations: Australia, Japan and Korea. It explores the significance of legal, regulatory and cultural differences, and draws lessons in terms of best practice and enforcement for legal and sporting authorities around the world.

Including key insights from players, the betting industry, law enforcement and prosecution authorities, it discusses the strengths and weakness of current anti-corruption strategies in the three jurisdictions. Match-Fixing in Sport: Comparative Studies from Australia, Japan, Korea and Beyond offers important insights for all students and scholars with an interest in sport studies, law, criminology and Asian studies. Now available in paperback, the Encyclopedia of International Sports

Page 42/72

Studies is the most authoritative and comprehensive single-volume reference work ever published on sport. With over one million words of text arranged into more than 1000 entries and articles, it covers the full range of sub-disciplines within sports studies; including scientific, social scientific and medical approaches. The encyclopedia is alphabetically organized and consists of: principal articles covering key disciplinary areas, such as sports economics and sports history large topical entries on central

subjects such as resistance training and the diagnosis of sports injuries smaller topical entries on subjects such as cross training and projectile motion short overviews of other important terms and concepts, from metabolism and motivation to muscle tension-length relationship. With over 150 contributing authors from the US, UK, Canada, Australia, South Africa, Japan, New Zealand, Hong Kong and continental Europe, the Encyclopedia of International Sports Studies is an unparalleled work of sports scholarship.

Page 44/72

Accessibly written, facts-fronted and including full cross-referencing and guides to further reading throughout, this is an essential addition to the bookshelf of any student, researcher, teacher or professional working in sport.

It is important for anybody involved in sport and physical recreation to be aware of the legal context in which their activity takes place, to develop an understanding of their legal responsibilities and to know what might happen if something goes wrong. Sport,

Physical Recreation and the Law is the first textbook on this difficult subject for students and practitioners in sport and physical recreation. Covering a wide range of legal principles and cases, this textbook introduces the reader to legal systems, terminology, databases and the use of case law. Designed to encourage analysis, reflection and the application of examples and ideas from the reader's own experience, the book clearly and comprehensively explains key topics such as: socio-legal aspects of sports violence

and criminal liability negligence and defences against negligence manslaughter by individuals and organizations in sport principles of natural justice, disciplinary tribunals and doping discrimination, harassment and child protection risk management, statutory duties, and breaches of health and safety criminal liability - recognized sports, hazing, and cage fighting. Including over 300 exercises, hypothetical scenarios, investigative tasks and seminar activities, this book is an essential

Page 47/72

course text for all students of sport, recreation and the law, and an invaluable reference for coaches, physical education teachers and those who play, lead or organize sport and physical recreation. Society is obsessed with categorising and treating individuals and groups according to their physical and non-physical differences, such as sex, gender, disability and race. This treatment can lead to the inclusion or exclusion of an individual from the tangible and intangible benefits of society. Where this

practice becomes discriminatory, legal frameworks can protect human rights and ensure that people are treated with due respect for their similarities and differences. In a sporting context, the inclusion and exclusion of athletes based upon their differences is often a necessary part of the essence of competitive sporting activity, arranged around rules and categories that can have an unequal exclusionary impact on certain classes of individual. Dominant sporting cultures can also have exclusionary

effects. This important and innovative book seeks to investigate the socio-legal and regulatory balance between inclusion and exclusion in competitive sport. It critically analyses a range of legal and non-legal cases concerning sport-specific inclusion and exclusion in the areas of sex, gender, disability and race, including those cases involving Oscar Pistorius, Caster Semenya and Luis Suarez, to identify the extent to which the law and sport adopt a justifiable and legitimate inclusive or exclusive approach

to participation. The book explores national and international regulatory frameworks, identifying deficiencies and good practice, and concludes with recommendations for regulatory reform. Inclusion and Exclusion in Competitive Sport is important reading for anybody with an interest in the relationship between sport and wider society, sports development, sport management, sports law, or socio-legal studies.

The Yearbook of International Sports Arbitration is the first academic publication aiming to offer comprehensive coverage, on a yearly basis, of the most recent and salient developments regarding international sports arbitration, through a combination of general articles and case notes. The present volume covers decisions rendered by the Court of Arbitration for Sport (CAS) and national

Page 52/72

courts in 2015. It is a must-have for sports lawyers and arbitrators, as well as researchers engaged in this field. It provides in-depth articles on burning issues raised by international sports arbitration, and independent commentaries by esteemed academics and seasoned practitioners on the most important decisions of the CAS (e.g. the Dutee Chand case) and national courts (e.g. the Pechstein and Wilhelmshaven decision rendered by the OLG München and OLG Bremen in Germany). Dr. Antoine Duval is Senior Researcher for International and European Sports Law at the T.M.C. Asser Instituut in The Hague. He holds a Ph.D. on the interaction

between Lex Sportiva and EU Law from the European University Institute in Florence. Prof. Antonio Rigozzi teaches international arbitration and sports law at the University of Neuchâtel, Switzerland, and is the partner in charge of the sports arbitration practice at Lévy Kaufmann-Kohler, a Geneva-based law firm specializing in international arbitration.

In this book various perspectives on fundamental rights in the fields of public and private international law are innovatively covered. Published on the occasion of the 50th anniversary of the T.M.C. Asser Instituut in The Hague, the collection reflects the

breadth and scope of the Institute's research activities in the fields of public international law, EU law, private international law and international and European sports law. It does so by shedding more light on topical issues – such as drone warfare, the fight against terrorism, the international trade environment nexus and forced arbitration – that can be related to the theme of fundamental rights, which runs through all these four areas of research. Points of divergence and areas of common ground are uncovered in contributions from both staff members and distinguished external authors, having long-standing academic relations with the Institute. The

Editors of this book are all staff members of the T.M.C. Asser Instituut, each of them representing one of the areas of research the Institute covers. Sport has enjoyed steadily increasing prominence and economic importance since the Millennium. But threats to its integrity appear to have grown in parallel, undermining the very sense of innocence and fun which is an important part of its appeal. Threats to the spirit of sport come from internal, external and even state actors, who seek either to manipulate events on the field or to exploit the institutions of sport for their own ends. As the reputation of sport becomes more tarnished as a

result, its sustainability as a significant part of the entertainment industry is called into question and loss of reputation may even result in decline in recreational play. In this wide-ranging collection of essays, the international team of contributors explores the structural economic sources of the problems that beset sport and address the question of 'what is to be done?' through economic reasoning. Specific topics covered include doping, match-fixing for betting or sporting gain, the role of forensic statistics in detecting nefarious activity, issues related to club ownership, corruption in the awarding of mega-events and within sports

governing bodies, and the role of the law and the Court of Arbitration for Sport. In the final chapter, the Editors pull together the various strands and propose that policy to mitigate the threat to fair play should be built around two themes: improving sports governance and designing incentives to help actors in sport choose honest over manipulative behaviour. The book will appeal to practitioners from sport management as well as to academics including students and researchers.

The Yearbook of International Sports Arbitration is the first academic publication aiming to offer comprehensive coverage, on a yearly basis, of the

most recent and salient developments regarding international sports arbitration, through a combination of general articles and case notes. The present volume covers decisions rendered by the Court of arbitration for Sport (CAS) and national courts in 2016. It is a must-have for sports lawyers and arbitrators, as well as researchers engaged in this field. International Sports Law Review

European Sports Law: Collected Papers 2nd edition

contains the collected works (1989-2012) of Stephen

Weatherill, Jacques Delors Professor of European

Community Law, Somerville College, University of

Oxford, United Kingdom, with an extensive

introduction on the background and rationale for the

selected papers. Stephen Weatherill is a leading

academic and author on the subject of European

Union law and professional sport. His work is of the highest academic standard and practice-oriented at the same time, which has a strong impact on major court cases and the development of international sports law in general. The updated 2nd edition is a vademecum for those involved with international sport and the challenges European law and sport provide and is an indispensable tool for administrators, managers, researchers, academics, marketers, broadcasters, advisers and practitioners. The book appears in the ASSER International Sports Law Series (ISSN: 1874-6926), under the editorship

of Dr. David McArdle, Dr. Ben Van Rompuy and Marco van der Harst LL.M.

This book accounts for over 25 of the most influential cases in international sports law, as written by some of the leading authorities in the area. Authors from Europe, the United States, Australia, South Africa, Canada and New Zealand trace the evolution of this emerging discipline of law through an analysis of individual cases, as discussed under a number of key debates and themes in contemporary sports law, including: the "public" nature of legal disputes in sport; player employment mobility litigation; doping

and the spirit of sport; TV rights holding proceedings; and enduring themes in sports law such as on-field violence, spectator safety, animal welfare and gender equality. Valuable for sports law academics, arbitrators and practitioners, sports administrators and governing bodies, but also for students (postgraduate and undergraduate) and all those with an interest in international sports law.

Through further technological development and increased globalization, conducting business abroad has become easier, especially for Small and Medium Enterprises (SME). However, the legal issues

associated with international commerce have not lessened in complexity, including the role of non-state rules. The book provides a comprehensive analysis of non-state rules in international commercial contracts. Non-state rules have legal authority in the national and international sphere, but the key question is how this legal authority can be understood and established. To answer this question this book examines first what non-state rules are and how their legal authority can be measured, it then analyses how non-state rules are applied in different scenarios, including as the applicable law, as a

source of law, or to interpret either the law or the contract. Throughout this analysis three other important questions are also answered: when can non-state rules be applied? when are they applied? and how are they applied? The book concludes with a framework and classification that leads to a deeper understanding of the legal authority of non-state rules. Providing a transnational perspective on this important topic, this book will appeal to anyone researching international commercial law. It will also be a valuable resource for arbitrators and anyone working in international commercial litigation.

Page 66/72

In this solutions-focused collection of sport corruption case studies, leading researchers consider how to re-establish trust both within sports organisations and in the wider sporting public. Inspired by the idea of "moral repair", the book examines significant corruption cases and the measures taken to reduce further harm or risk of recurrence. The book has an international scope, including case study material from Europe, Asia, Africa, Australia and New Zealand, and covers important contemporary issues including whistleblowing, bribery, match-fixing, gambling,

bidding for major events, and good governance. It examines the loss of trust at both national and international levels. Drawing on cutting-edge research, the book includes both on-field and off-field examples, from Olympic, non-Olympic, professional and amateur sports, as well as diverse academic and practitioner perspectives. Offering an important contribution to current debates and a source of reflection on best professional practice, *Restoring Trust in Sport* helps us to better understand why corruption happens in sport and how it can and should be addressed. This is

Page 68/72

invaluable reading for all advanced students, researchers, managers and policy makers with an interest in integrity in sport, sport ethics, sport management, sport governance, sports law, and a useful reference for anybody working in criminology, business and management, law, sociology or political science.

How Laws are Abused to Protect Commercial Rights to Major Sporting Events

This book undertakes a critical examination of commercial rights to sports mega-events (focusing on sponsorship), the exclusivity of such rights and the legal implications of the modern mega-event sponsorship model. It examines ambush marketing of events and the law's treatment of ambushing (specifically in the form of sui generis event legislation) in a review of 10 major jurisdictions selected on the basis of the importance of the events they are to host in the near future or have hosted recently, and the relevant domestic legislation. It critically examines the legitimacy of such commercial rights protection by means of the use of laws in the context of

accepted principles of intellectual property law, competition law and human rights law. Specifically, it questions the legitimacy of the creation of statutory 'association rights' to mega-events, and considers potential future developments in respect of the law's treatment of mega-event commercialisation. Valuable for practitioners and academics (in the fields of sportslaw/sponsorship/marketing/intellectual property law); sports administrators (sports governing bodies); corporate sponsors of sports and other events; potential mega-event host governments and law-makers; civil rights organisations.

Understanding Sport Organizations provides a strong foundation in organizational theory and organizational behavior and addresses how that theory is applied in a real-

world context. It engages readers by providing opportunities to discover the theory in practice.
