In the Vision guide, we will begin to explore using Vision for previsualization. In addition, we will show how to properly configure lighting devices in Vectorworks, for export to Vision. You will be introduced to dmx, patching, fixture modes, as well as configuring a custom lighting device in Vectorworks, for use in Vision.

VWU: Course categories - Vectorworks

Import into an existing Vectorworks drawing is not recommended, because it can produce unexpected results. For the same reason, if you import more than one file with the Import DXF/DWG or DWF command, ensure that the files are very similar. Select File > Import > Import DXF/DWG or DWF. The Import dialog box opens.
