Work-based learning is going to give employees the opportunity to learn at work. As a result, they will view the business as a place of learning and earning. This will lead to them acquiring new respect for the business and of course take this opportunity to try and help the business grow.

What is work-based learning and what are the benefits? | IED

Work-based learning is a radical approach to the notion of higher education. Students undertake study for a degree or diploma primarily in their workplace and their learning opportunities are not contrived for study purposes but arise from normal work. "Work-based Learning" is the first comprehensive book on this major innovation.

Work-based learning: A New Higher Education? Society for ...

27/03/2020 14:06:00. Enabling a culture of work-based learning can bring a wealth of benefits for individuals, patients, teams and employers. For employers it can bring additional recruitment pipelines and develop the existing and future workforce. As learning is facilitated in the workplace, individuals will further understand what your organisation does and how you work, while developing technical skills, and understanding the behaviours and values needed.
